

Backlinks Report - 18 May 2026

1. Executive Summary

- The website currently has **868 total backlinks** from **34 referring domains**.
 - The **Authority Score is 2**, indicating that the overall backlink quality remains low.
 - Most backlinks are **text-based**, and most are **follow links**, which is positive.
 - However, most referring domains have a low authority score, especially in the **0–10 range**.
 - The most common anchor text is **“Empty Anchor”**, which means many backlinks do not have clear or visible anchor text.
 - The backlink profile has good link volume, but it needs improvement in **domain quality, anchor text optimization, and authority growth**
-

Key Findings

- The website has a good number of backlinks, but the **Authority Score is low**.
- Most referring domains are low-authority domains, especially in the **0–10 authority score range**.
- A high percentage of backlinks are **follow links**, which is a positive sign.
- Most backlinks are text-based, which is good for SEO visibility.
- The backlink profile lacks high-authority domains from the **61–100 score range**.
- The anchor text profile needs improvement because “**Empty Anchor**” is the most common anchor.
- There are no backlinks from **.gov** or **.edu** domains.
- The majority of referring domains come from the **United States**.

Recommendations

- **Build more high-authority backlinks:** Focus on getting backlinks from trusted websites with higher authority scores.
- **Improve anchor text quality:** Try to reduce empty anchor text and use more relevant anchors such as brand names, product names, and target keywords.
- **Increase referring domain diversity:** Get backlinks from more unique and relevant domains instead of relying on a small number of sources.
- **Target industry-relevant websites:** Focus on backlinks from AI, SaaS, ecommerce, technology, and business-related websites.
- **Create link-worthy content:** Publish blogs, case studies, guides, and reports that other websites may naturally link to.
- **Look for guest posting opportunities:** Reach out to relevant websites for guest posts and content collaborations.
- **Monitor low-quality backlinks:** Review backlinks from low-authority or suspicious domains to make sure they do not affect SEO performance.
- **Improve country-level backlink diversity:** Since most domains are from the United States, try to get backlinks from other target markets as well.
